

Cub Cadet[®] GARDEN TRACTORS

Cub Cadet

Power Equipment

Cub Cadet®

The tough tractor that's right for you.

Whether you're a homeowner, a weekend farmer, or a grounds care professional choosing a garden tractor, there's really only one decision to make – which tough Cub Cadet tractor is right for you.

Every Cub Cadet garden tractor is built tough. Tough is a full-length, twin-channel steel frame. Tough is a cast-iron front axle. Tough is a 2-year limited warranty. Built tough to handle your toughest jobs.

And for 1987, Cub Cadet has designed a product line that features a garden tractor for every individual and every size job. With a wide variety of optional attachments, you can till, plow, clear snow, mow, tow, cultivate and more for year-round versatility.

12 H.P. GARDEN TRACTOR SERIES For Average Size Suburban Lawns

Buying your first tractor? Have an average size lot to mow? A small garden to tend? If you want more than a lawn tractor but really don't need a big garden tractor, one of these affordable Cub Cadets will fit your needs perfectly. Models 1204, 1210 and 1211 are all powered by Kohler's dependable single-cylinder, cast-iron 12 H.P. engine. With a choice of three models, you can select 4-speed or direct drive hydrostatic drive with manual or hydraulic lift.

18 H.P. GARDEN TRACTOR SERIES For Average To Large Size Lawns

These are America's most popular size garden tractors. And with good reason. Model 1810, 1811, 1812

and the new 1806 step up to a more powerful, smooth running 18 H.P. twin-cylinder Kohler engine to increase your yard care capabilities and decrease the time you spend working in your yard. Once again, with direct drive shaft, you have a choice of 6-speed or hydrostatic drive with manual or hydraulic lift.

SUPER GARDEN TRACTOR SERIES For Large Country Properties, Estates, And Professional Grounds Maintenance

All-new for 1987, Cub Cadet Super Garden Tractors feature a larger 78.5" frame and bigger tires for the really tough jobs. With standard features like *power steering* and hydrostatic drive, you get farm-tractor power in a garden tractor that's comfortable and easy to operate.

For mowing large areas, towing heavy loads and lots of gardening, models 1872 and 2072 feature 18 and 20 H.P. twin-cylinder, air-cooled Kohler engine.

If lawn care is your business, Cub Cadet's model 1572 diesel is your tractor. Its three-cylinder liquid-cooled engine gives you power that's quieter, smoother and longer lasting.

TAKE A LOOK

Take an inside look at why Cub Cadet garden tractors have been America's choice since 1961. You'll find that a Cub Cadet, backed by service professionals and a two-year limited warranty, is one tough tractor that's right for you.

Ask your Cub Cadet dealer for brochures on our lawn tractors and rear engine riders, too.

Cub Cadet
One Tough Tractor

Here's what makes us tough.

Hydrostatic Lever
Conveniently mounted on dash.

Dashboard
Full instrumentation includes electric power take-off switch, hour meter and volt meter.

Hydraulic Lever
Hydraulically lifts the mowing deck and features a memory device for uniform cutting height (optional).

High-Back Cushioned Seat
Easily adjusts for operator's comfort. Deeply ventilated for cool seating on hot summer days.

Seat Safety Switch
Automatically shuts tractor off when power take-off is engaged and operator dismounts.

Fender
One piece, all steel.

Heavy-Duty Rear Axle
Hydrostatic tractors feature a cast iron differential housing. Dip stick to check oil level. Forged steel ring and pinion gear. 1" forged steel axle. Steel cut differential gears. Ball bearings on pinion shaft. Tapered roller bearings on differential carriers. Die cast aluminum alloy case and axle carriers.

High Flotation Tires
Provide excellent traction. Agricultural type tire optional.

Dual Disc Brakes
Provide safe, even control when stopping. (On all models except 1204.)

Hydrostatic Transmission (Sundstrand)
More than 20 years of proven performance on Cub Cadet garden tractors. Provides infinite ground speed up to 7.5 mph. (On all models except 1204 and 1806.)

Drive Shaft
From engine to transmission. (except model 1204.)

Floating Mower Deck
Features four adjustable anti-scalp gauge wheels and one roller with memory lift. Mower spindles feature grease fittings.

atures

nts

Steering

Enclosed automatic type cam & lever steering with grease fitting.

Fuel Tank

Four-gallon, rustproof tank.

Heat Baffle

Protects operator from engine heat.

Spin-On Oil Filter

Maintains cleaner, cooler engine oil. Standard on all 18 and 20 HP models.

Air Filter

Paper cartridge with foam precleaner protects engine from debris.

Engine

Kohler engines (12, 18 and 20 H.P.) with replaceable cast-iron cylinders for extended life (except 12 H.P.). Kubota 15 H.P. diesel engine on model 1572.

Headlamps

Provide visibility in all conditions for safe operation.

Front Grille

Removable for easy access to front power take-off and mower drive belt.

Solid State Ignition

Provides faster starts under all conditions.

Full Pressure Lubrication

For protection of internal engine components. (Standard on all 18 and 20 HP engines.)

Frame

Full-length twin-channel steel, C-shaped. Provides solid support for operator and attachments.

Front Axle

Made of cast iron to endure stress and strain.

Features listed are common on most garden tractors, except where otherwise noted.

12 H.P. GARDEN TRACTOR SERIES

Powered by Kohler, the finest air-cooled engines in the industry, these tractors are tough enough to handle your yard work all year long.

When you need more than a lawn tractor, Cub Cadet models 12O4, 121O and 1211 for average size yards are versatile, affordable answers.

You'll get the most from your investment with a full range of lawn and garden attachments for all kinds of chores, for every season of the year. Just a sampling of the optional

attachments available include a snow blade, snowthrower, tiller, trailer and 38", 44", or 50" mowing decks.

Dependable Kohler engines power all three models. These 12 H.P. single-cylinder engines are designed for durability. They feature all cast-iron blocks, bearings at both ends of the crankshaft for strength, and dual

element air cleaners to keep engines running cleaner and longer.

Models 121O and 1211 feature easy, hydrostatic drive, while model 12O4 has a reliable Peerless 4-speed transaxle transmission. You also have a choice of lifts: hydraulic on model 1211, manual on models 12O4 and 121O.

Cub Cadet's 12 H.P. Kohler engine features a solid state inductive electronic ignition which produces a stronger spark for easy, cold-weather starting. Newly designed pistons control oil use, reduce vibration and noise. Balance gears minimize vibration.

With hydrostatic drive, you never have to clutch or shift. It's the ultimate in riding convenience. For safety, hydrostatic lever automatically returns to neutral when you depress the brake. Hydrostatic drive is direct drive shaft from engine to the heavy-duty transmission.

18 H.P. GARDEN TRACTOR SERIES

Designed for medium to large size lawns, these powerful tractors offer a choice of features and a full range of yard work capabilities.

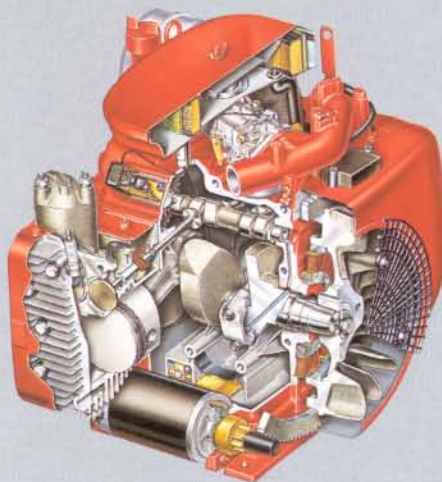

Cub Cadet's most popular tractor series offers four 18 H.P. models with a variety of options to match the tractor to your needs.

The new model 1806 with 6-speed direct drive and model 1810 with hydrostatic drive are favorites for quickly mowing large areas of grass. Choose from optional 38,"44" or 50" mowing decks to cut an acre of grass in 45 to 75 minutes.* Both models come standard with manual lift.

Hydrostatic model 1811 adds the convenience of hydraulic lift for effortless raising and lowering of attachments. And model 1812 goes even further with dual front hydraulic outlets for angling a front snow blade.

With all the muscle in these 18 H.P. Kohler-powered tractors, you'll also want to check into the full range of yard work capabilities available with Cub Cadet's large selection of optional attachments. From tilling your garden to clearing snow, they'll help you get the most out of your tractor every season of the year.

**Approximate mowing speed for flat lawn with no obstacles. Varies with deck size.*

Cub Cadet's 18 H.P. garden tractors feature Kohler's high-performance twin-cylinder engine which delivers high torque levels at lower rpm. Solid state inductive electronic ignition produces a stronger spark for easy starts in cold weather. And the standard spin-on oil filter maintains a cleaner, cooler engine. Kohler's advanced design also reduces operating temperatures, oil use, vibration and noise.

Optional 38", 44" or 50" mowing decks are available on models 1204, 1210, 1211, 1806, 1810 and 1811.

SUPER GARDEN TRACTOR SERIES

New for 1987, a series of large frame garden tractors with the heavy-duty power and performance required for your biggest jobs.

Now the tough gets tougher. Cub Cadet's new Super Garden Tractor Series consists of three models that work like farm tractors to handle heavy chores on large properties quickly and easily.

They're larger than other garden tractors - with a 78.5" full-length twin-channel steel frame, 18" x 8½" front tires, and 26" x 12" high flotation turf tread rear tires.

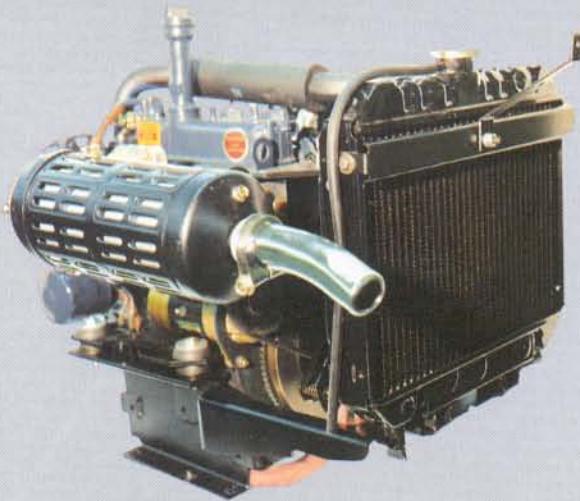

They're also more powerful - model 1872 with an 18 H.P. twin-cylinder engine, model 2072 with a 20 H.P. twin-cylinder engine, and model 1572 with a 15 H.P. three-cylinder diesel engine (great for professional use).

But these three models are even better than farm tractors, because they represent the ultimate combination of power and comfort. They are operator-oriented machines with convenient features like no-clutch, no-shift hydrostatic direct drive and hydraulic lifts with dual front outlets. *Standard power steering makes turning absolutely effortless, and an ad-*

justable, high-back cushioned seat keeps you comfortable on long rides.

In addition to the optional accessories available for all Cub Cadet garden tractors, special attachments available just for the Super Garden Tractor Series include a 54" snow blade, 48" tiller and 50" or 60" mowing deck.

For professional results on large properties, your choice is clear. Cub Cadet Super Garden Tractors are the tough tractors that get the job done.

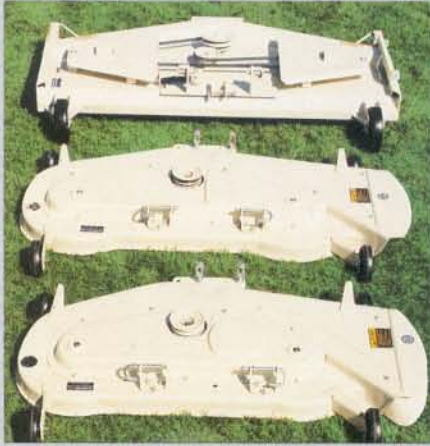

Kubota's three-cylinder, liquid-cooled diesel engine is the most durable, efficient engine around. Because diesel fuel has a higher BTU rating than gas, you use up to 40% less fuel. And a triple combustion system on this engine efficiently mixes fuel and air to get every bit of power out of fuel. Liquid cooling controls temperature more consistently, which increases engine life. Operation is also smooth and quiet - 4 to 6 decibels lower than air-cooled engines. If lawn care is your profession, then this is the engine you want.

Standard for model 1572, a disconnect clutch automatically disengages the transmission for easier cold weather starting. The disconnect clutch is available as optional equipment on all hydrostatic garden tractors manufactured since 1979.

Attachments

Cub Cadet's "Quick Attach" System Makes Attachments Easy To Attach and Remove ... No Tools Required.

MOWING DECKS

60" Model 19O374; 44" Model 19O358; 50" Model 19O359 (38" Model 19O357 not shown)

These semi-floating decks are designed for a level, even cut over bumps and dips. Four anti-scalp wheels on the 44" and 50" decks work with four-point suspension to prevent scalping. Decks easily attach and remove – no tools required.

SNOW BLADES

42" Model 19O375; 54" Model 19O376

Clears snow, grades soil and performs other chores for year-round use. Spring-loaded trip and return protects blade and tractor. For best traction, tire chains and wheel weights are recommended. Blades easily attach and remove – no tools required.

SNOWTHROWER

45" Model 19O364

High-speed, two stage design cuts through drifts and throws snow up to 40 feet away. Chute direction is controlled from operator's seat. 20" opening height, 15"-diameter auger, and 45" clearing width. Adjustable skid shoes and drift cutters are included.

ROTARY TILLER

38" Model 19O371

This 38"-width tiller operates directly from front PTO and is controlled by the electric clutch. It covers rear wheel tracks, and tine shield in down position leaves a fine seedbed surface. Tilling depth adjusts down to 7". Heat-treated tines easily remove for cultivating narrow rows.

TRAILER

10 Cu. Ft. Model 19O368

Haul any load up to 1200 lbs. in trailer's heavy-gauge, all-steel body. Tailgate easily removes for oversize loads. Dumps from operator's seat with convenient release lever. Also includes 16" pneumatic tires. (17 cu. ft. heavy-duty trailer also available.)

LAWN SWEEPERS

32" Model 19O482; 38" Model 19O483

Eliminate raking with a lawn sweeper attachment. Choose from 14-bushel (32") or 19-bushel (38") capacity. Sweeper easily dumps from operator's seat. Both models feature infinite brush height adjustment, oversize 10" semi-pneumatic tires and wind screen.

ROTARY TILLER

38" 8 H.P. Model 190400

Powered by an 8 H.P. Briggs and Stratton engine, this tiller breaks up soil, blends in fertilizer and cultivates. Tine engagement and tilling depth adjusts from operator's position. The twenty-four 14"-diameter tines prepare a seedbed in one pass. This model mounts to any ground engaging tractor equipped with sleeve or Category "O" 3-point hitch.

CATEGORY "O" 3-POINT HITCH

Models 190388, 190389, 190383

This hitch mounts a number of attachments to Cub Cadet garden tractors. Model 190388 hitch includes heavy-duty spring assist for mechanical lift tractors.

Buy with confidence from Cub Cadet.

One of the most important reasons to buy quality Cub Cadet products is the expert, full-service dealer who stands behind them.

There are over 1400 independent Cub Cadet dealers nationwide – all equipment experts who know Cub Cadet products inside and out. They're trained to service Cub Cadet products, and they can get the parts you need fast.

Your Cub Cadet dealer also

provides fast and easy credit with competitive rates through Cub Cadet's Express financing plan.

When you buy a Cub Cadet, you buy with confidence from a leader in the industry. Cub Cadet was established in 1961 as a subsidiary of International Harvester. Today, Cub Cadet Corporation independently engineers and manufactures outdoor power equipment, continuing the tradi-

tion of quality excellence and customer service started 25 years ago. Our farm heritage assures you of rugged, long-lasting performance.

Visit your local Cub Cadet dealer for all your lawn and garden equipment needs. He can answer your questions and help you select the products that are right for you.
