The Rugged Cub Cadet Lawn Tractor

**ALL THE
TOUGHNESS
AND
VERSATILITY
YOU EXPECT.**

THE VIRTUES OF A CUB CADET.

*E*very Cub Cadet lawn tractor is designed and built to provide all the qualities you look for in a tractor. An extra margin of power — to handle tough jobs. Ease of handling — to make yard work a pleasure. Smooth, trouble-free operation — with a minimum of maintenance. Rugged durability — to stand up to year after year of hard use. Total reliability — to start quickly and easily every time. Outstanding versatility — to do more than one job, and do them all exceptionally well. Extended service life — to pay back your investment many times over. Safety protected — to help prevent accidents. Innovative engineering and state-of-the-art technology — to provide you with the ultimate in performance, convenience, and value. Every Cub Cadet lawn tractor is designed and built with you — and your little corner of the world — in mind. And every Cub Cadet tractor is backed by our network of trained service professionals — and our exclusive 2-year limited warranty. Cub Cadet. Toughness you can depend on!

Model 1720 Lawn Tractor

17 H.P. Engine / Hydrostatic Transmission / Optional 46" Cutting Deck

46" High-Vacuum Cutting Deck

Optional 38" And 46" High-Vacuum Cutting Decks Are Available For Model 1720 Lawn Tractor.

SUPER SMOOTH, WITH POWER TO SPARE.

If you're looking for a rugged, powerful, super-reliable tractor for all your lawn mowing and snow removal chores — look no further. The Model 1720 does it all. And does it with luxurious smoothness, comfort and ease-of-handling.

The heart of the 1720 is a 17 H.P., twin-cylinder Kohler engine — with cast-iron cylinders and automotive-type full-pressure lubrication. And that means you have all the smooth-operating power you'll ever need.

The state-of-the-art electronic ignition means you get fast, easy starts every time.

The spin-on oil filter means the engine

will run clean and cool, with less frequent oil changes. And the dual-element air filter means maximum airflow and filtration — for fuel efficient combustion.

Want to talk rugged? Consider our welded, full-length, twin-channel steel frame, and cast-iron front axle. This is toughness you can depend on.

But for all its power and ruggedness, the 1720 is definitely easy to operate. The no-clutch hydrostatic drive is real smooth — and provides a nearly unlimited number of ground speeds. The "return to neutral" safety feature automatically places the drive system in neutral when the brake is fully depressed.

The adjustable, cushioned seat, soft-grip steering wheel and easy-to-reach controls including electric PTO switch, are reminiscent of a luxury sports car.

Best of all, underneath all that smooth-operating comfort, is a lean, mean, mowing machine! Take your choice of a 38" high-vacuum deck with an optional 6.5-bushel twin bagger — a 46" high-vacuum deck with an optional 10-bushel triple bagger — or a 44" deck.

In the fall, your 1720 gobbles up leaves like nothing you ever used before! The 38" and 46" decks produce sufficient vacuum to bag leaves and clippings without an auxiliary blower.

In the winter, the 42" snow blade, or 40" snowthrower clears away even the heaviest snowfalls so fast, you won't have time to get cold.

And in the spring, the 38" de-thatcher clears away dead grass in a flash.

The 1720 is truly a lawn tractor for all seasons.

Model 1420 Lawn Tractor

14 H.P. Engine / Hydrostatic Transmission / Optional 38" Cutting Deck

38" High-Vacuum Cutting Deck

Optional 38" And 46" High-Vacuum Cutting Decks Are Available For Model 1405 and 1420 Lawn Tractors.

BIG PERFORMANCE, FOR BIG YARDS.

If your yard seems slightly larger than the Ponderosa on mowing day, put your brand on a Cub Cadet 1420. It's right at home on the range — with power and performance as big as all outdoors.

All that power comes from a 14 H.P. twin-cylinder Kohler engine — with full-pressure lubrication, spin-on oil filter and a dual element air filter. And that's all the power you're ever likely to need.

The 1420 has all the quality features found in our top-of-the-line 17 H.P. tractors. And that means you've got yourself one tough, smooth running, easy-to-operate machine.

The state-of-the-art electronic ignition gives you instant starts every time — even in the coldest weather.

The no-clutch hydrostatic drive transmission, lets you change speeds as easily as you change your mind.

And the adjustable, cushioned seat, soft-grip steering wheel and easy-to-reach controls including electric PTO switch, make operating the 1420 too much like fun to be work.

But don't be fooled by all the comfort. Underneath it all, the 1420 is as tough as they come. Just check our welded, full-length, twin-channel steel frame, and cast-iron front axle.

Most importantly, the 1420 has what it takes to get the job done.

For mowing, you can take your choice of a 38" high-vacuum deck with an optional 6.5-bushel twin bagger — a 46" high-vacuum deck with an optional 10-bushel triple bagger — or a 44" deck.

In the fall, either of the bagging decks makes leaf collection a snap.

In the winter, just attach the 42" snow blade, or 40" snowthrower, and clearaway even the heaviest snowfalls fast.

And in the spring, the 38" de-thatcher clears away dead grass, for a healthier, more attractive lawn.

If you've got a big lawn, you need a big-lawn tractor: the tough, powerful Cub Cadet 1420.

Model 1405

The Model 1405 is the same as the Model 1420 except it has an over-head valve, single-cylinder Kohler engine and the easy-clutch, easy-shift 5-speed transmission.

*Model 1405 Lawn Tractor,
With Optional 46" Cutting Deck
And Triple Bagger.*

Maintenance.*

Model 1320 Lawn Tractor

12.5 H.P. Engine / Hydrostatic Transmission / Standard 38" Cutting Deck

Model 1315 And
1320 Lawn
Tractors Feature
A Standard 38"
High-Vacuum
Cutting Deck.

FUEL-SAVING EFFICIENCY, FOR SMALLER YARDS.

If your yard is not quite large enough for our higher powered tractors — the Model 1320 will fit your requirements — and your yard — to a T. The 12.5 H.P. Overhead Valve Kohler engine provides all the power you'll ever need — plus money-saving fuel-efficiency. And the cast-iron cylinder liner means longer engine life.

What's more, the 1320 offers many of the quality features found in our higher powered models.

Full-pressure lubrication disperses oil evenly over all bearing surfaces — even on slopes. The spin-on oil filter reduces engine wear to a minimum, and smooth, quiet, hydraulic valve lifters never need adjustment.

Changing speed is smooth and easy with our no-clutch hydrostatic drive.

And the 1320 is totally tough — with a welded, full-length steel frame, and a cast-iron front axle. This gives the 1320 the rugged durability to stand up to years of hard, year-round use.

And speaking of year-round use:

Spring, summer and fall, your 1320 can handle a variety of chores. The standard 38" high-vacuum mowing deck, with two large blades, lifts grass up for a clean, even cut. Add the optional 6.5-bushel twin bagger, and you have a complete mowing system that gets the job done fast, with results you'll be proud of.

For a truly, picture-perfect lawn, include the optional front-mounted de-thatcher.

In winter, just attach a 42" snow blade, or 40" snowthrower, and clear away snow as easily as you mow your lawn.

So even if you don't have a king-size lawn — you can still treat yourself to a lawn tractor fit for a king: the rugged, powerful Cub Cadet 1320.

Model 1315

The Model 1315 is identical to the 1320, except that it has an easy-clutch, easy-shift 5-speed transmission.

*Model 1315 Lawn Tractor, With
Standard 38" High-Vacuum Cutting
Deck And Optional Double Bagger.*

*The 12.5 H.P.
Kohler Command
Engine Provides
Rugged Power For
Model 1315 And
1320 Lawn
Tractors.*

Model 1020 Lawn Tractor

10 H.P. Engine / Hydrostatic Transmission / Standard 32" Cutting Deck

Standard 32" High-Vacuum Cutting Deck For Model 1015 And 1020 Lawn Tractors.

VALUE, WITHOUT COMPROMISE.

Don't be fooled by the word "economy". The Model 1020 costs less to buy and operate than higher powered Cub Cadet models. But be assured that it's a genuine Cub Cadet, top to bottom. And that means outstanding quality and value all the way.

Power is supplied by a reliable, fuel-efficient 10 HP Briggs & Stratton engine — with a cast-iron cylinder wall liner for longer engine life. Specially designed

hardened steel valves and valve seats prevent build-up of deposits, and filter impurities for cleaner, smoother operation.

It all adds up to outstanding low-speed lugging power that handles even tall, thick grass without hesitation.

And the 1020 has the same rugged toughness found in more expensive Cub Cadet models. The full-length, twin-channel steel frames and cast-iron front axles have the strength and durability to stand up to many years of hard use.

Other quality features include convenient hydrostatic, no-clutch transmission — for a nearly unlimited number of ground speeds. And the "return to neutral" safety feature automatically places the drive system in neutral when the brake is fully depressed.

There's no compromise when it comes to mowing capability, either. The 32" high-vacuum deck actually lifts grass up, for a clean, even, professional-looking cut. Add the optional 6.5-bushel twin bagger and you have a complete lawn system at a completely affordable price.

For winter use, add an optional 42" snow blade, or 40" snowthrower — and clear away snow quickly and easily.

The Cub Cadet 1020. Economical? Yes. Powerful, rugged and convenient? Definitely!

Model 1015

The Model 1015 is the same as the Model 1020, except it has an easy-clutch, easy-shift, 5-speed transmission.

Model 1015 Lawn Tractor, With Standard 32" Cutting Deck.

Model 1020 Dash Is User-Friendly, With Easy-To-Use Controls And Switches.

The 10 H.P., Commercial Briggs & Stratton Engine Provides Plenty Of Power For Model 1015 And 1020 Lawn Tractors.

Here's What Makes Us Rugged.

Optional Twin Bagger or Triple Bagger
Lifts up for easy bag removal.

Cushioned Seat
Easily adjusts for operator's comfort.

Seat Safety System
Provides operator dismount protection.

10-Bushel Triple or 6-Bushel Twin Bagger Capacity
Heavy duty "tight weave" nylon bags. Plastic garbage bags can be used as inserts.

Speed Control Lever
Conveniently located on dash.

Fuel Tank
3.0 gallon, rustproof tank.

Mower Deck Spindles
Double tapered roller bearings with grease fittings for long life.
